

MMSD Planned Construction or Services Bids*

April 1, 2024 - March 31, 2025

Contract # (if known)	Contract Name and Scope	Advertise Quarter	Advertise Year
W11031C04	30th Street Corridor Wet Weather Relief Phase 2a Early Out Soil Management - Excavation, transport, and disposal of approximately 90,000 tons of contaminated soil.	2	2024
C03014C01	Greenfield Park and Underwood Creek Pump Stations Upgrades - The scope includes rehabilitation or replacement of process mechanical, electrical and control systems at two conveyance pump stations.	2	2024
M01048C01	Security Improvements - The scope replaces the access control, security camera, and visitor management systems at the Jones Island Water Reclamation Facility (WRF), South Shore WRF, Headquarters, Laboratory, and 13th Street facility. The contract will provide a new seamless system for access control and visitor management. The contract will replace all existing access control, visitor management and video surveillance systems, expand surveillance capabilities, and integrate surveillance into the access control systems	2	2024
S02018C01	RAS Pumps Replacement - The scope replaces eight return activated sludge (RAS) pumps and motors. Mechanical work includes replacement of pump suction and discharge piping, expansion joints, check valves, isolation valves and piping supports. Electrical work includes replacement of the pump motors, variable frequency drives, 480V switchboard breakers, and associated conduit and wiring. Control work includes replacement of RAS pump instrumentation and transmitters. Other work includes removal of concrete, providing new concrete equipment pads, masonry, doors, finishes and painting.	2	2024
G98023P01-06	Art Intersection - Project will bid through Greenprint Partners. The project is located on former residential lots where the structures have been demolished. The total site area is approximately 0.9 acres. Improvements consist of the construction of a bioretention basin with an outfall connection to an existing sewer lateral. Stormwater is collected by trench drains located in an adjacent alley and directed into the bioretention basin. Proposed gravel pathways will provide pedestrian access to the site. The site will be fenced.	2	2024
G98023P01-05	Catapult Wellness - Project will be bid by Greenprint Partners. The project is located on a former industrial property. The total site improvement area is approximately 0.9 acres. Improvements consist of the removal of existing asphalt pavement and other miscellaneous site features, excavation, installation of subsurface stormwater storage chambers, installation of concrete curbs and sidewalk, asphalt paving, striping, landscape planters, fencing and landscape restoration.	2	2024
G98023P01-07	Escuela Verde - Project will be bid through Greenprint Partners. The project is located on a former residential property where the structures have been demolished. The total site improvement area is approximately 0.2 acres. Improvements consist of excavation, installation of subsurface stormwater storage chambers, grading of a bioswale, minor asphalt patching, minor concrete patching, and landscape restoration. Stormwater will be captured via a trench drain in an adjacent alley as well as directed to the bioswale through a street curb cut. Stormwater is then stored in the subsurface chambers before being released back to the sewer system.	2	2024
G98023P01-11	Mt. Zion Bioretention Basin - Project will be bid through Greenprint Partners. The project is located in Mt. Zion Lutheran Church parking lot. The site improvement area is approximately 0.3 acres. Improvements consist of construction of a bioretention facility in the parking lot area and associated storm sewer construction. The basin will be restored with native plants.	2	2024
G98023P01-08	Orthopedic Hospital of Wisconsin (OHOW) - Project will be bid through Greenprint Partners. The project is located on the site of a former hospital building that has been demolished. The project will install a bioretention facility surrounded by native plantings with grass pathways. The project area is approximately 2.4 acres.	2	2024

MMSD Planned Construction or Services Bids*

April 1, 2024 - March 31, 2025

Contract # (if known)	Contract Name and Scope	Advertise Quarter	Advertise Year
W40009C01	KK River Jackson Park: Demolition, Salvage & Recycling at 3460 W. Leeds Place - The scope includes demolition, salvage and recycling of a building, earthwork, landfill disposal of soil, and surface restoration at 3460 West Leeds Place in Milwaukee, WI.	3	2024
S02017C01	Process Air Header Improvements - The scope replaces the four buried 30-inch blower branch pipes from the Blower and Generator Building 326 to the buried 60/90-inch main air header, patch areas of corrosion on the buried 60/90-inch main air header adjacent to the blower branch pipes, and replace the 30-inch blower branch pipe isolation valves and expansion joints inside Building 326. The new buried piping will be carbon steel with external coating. The scope also includes removal of an existing coal tar enamel coating that contains asbestos on portions of the branch pipes, maintain the existing cathodic protection system through and after construction, and surface restoration.	3	2024
J02012C01	Aeration System Improvements - The work repairs leaking mechanical joints on the existing 48-inch, 54-inch, and 6--inch diameter cast iron pipe using internal seals and external clamps.	3	2024
J04076C01	Compressed Air System Upgrades - The scope will replace nine existing compressors in three buildings with two new centralized compressor systems in two buildings; replace two compressors and remove seven compressors. The scope also includes new air dryers, storage tanks, mechanical piping, electrical, instrumentation and controls.	3	2024
J04077C01	Odor Control at Equalization and Blend (E&B) Facility - The scope consists of adding a new treatment stage for Equalization and Blend tank air emissions. The improvements include a new biological scrubber located upstream of a new carbon adsorption unit, odorous air piping, and a booster fan, if needed. The E&B building will be modified to add a vertical extension to the odor control room above the existing roof line, including new walls, removable roof, and door access. Associated improvements include HVAC, drain piping, lighting, electrical, instrumentation and controls work.	3	2024
W40009C02	KK River Jackson Park: Sport Courts and Soccer Fields - The scope consists of construction of sport courts and soccer fields in Jackson Park located at 3500 W. Forest Home Avenue, Milwaukee, Wisconsin. The work includes earthwork, tree removal, landfill disposal of soil, pavement placement surfacing, installation of court furnishings, storm sewer modifications, construction of a bioswale and surface restoration.	3	2024
C98065C01	Separate Sewer Outfall Abandonment - Project consists of decommissioning and abandonment of nine Sanitary Sewer Overflow Outfall sites. Decommissioning and abandonment includes: removing all equipment, including gates, stoplogs, monitoring equipment, telemetry, and I&C. Remove electrical service as necessary to decommission the site. Properly bulkhead and abandon the outfall pipe per state standards/requirements.	4	2024
W20033C01	Menomonee River Levee System Accreditation - The scope includes levee and floodwall freeboard improvements along with storm sewer closure improvements integral with or near the Hart Park levee system.	4	2024
W10004C01	Milwaukee River Habitat Enhancement - Estabrook Falls - Remove bedrock from the bed of the Milwaukee River to improve hydraulic conditions for passage of native fish. Restore vegetation.	4	2024
