## FORM 4C: Medical Facility Compliance and Outreach Summary

### General Outreach to All Medical Facilities

<b>Outreach Accomplished</b>	
October 1, 1999	The District held a <i>Reducing Mercury in Health Care</i> workshop.
1998, 2000 & 2001	Collection Programs occurred. Hospitals utilized these programs and more than 2,200 pounds of mercury and mercury containing devices were collected.
October 5, 2005	The District mailed best management practices (BMP) questionnaires to the 16 hospitals listed on Form 4A.
2005 - 2006	The District visited 13 hospitals to discuss mercury issues and identify sampling locations (See table below)
2017	The District added veterinarians and clinics to the medical facility inventory and verified 18 vet offices, 1 hospital, 1 medical lab, and 1 nursing home.

<b>Hospital</b>	<b>Visit Date</b>
Aurora Sinai Medical Center	October 26, 2005
Children's Hospital of Wisconsin	November 3, 2005

**FORM 6C: School and Educational Facility Compliance and Outreach Summary**

**General Outreach to All School and Educational Facilities**

<b>Outreach Accomplished</b>	
1998-1999	Promoted the curriculum package <i>Mercury in Your Community and the Environment</i> by contacting teachers by mail and holding workshops
2000-2001	Collected 3,199 thermometers, 22 barometers, 11 sphygmomanometers, and 235 pounds of other materials from 56 schools in exchange for \$17,315 in rewards, using funding provided by the Department of Natural Resources
2006	Mailed BMP questionnaire to all High Schools in the District. Six schools responded, one school reported implementation of all wastewater best management practices
2016	Milwaukee Public Schools' District Administration was contacted for assistance in contacting its schools directly. A letter was received from MPS that stated all its schools have implemented best management practices.
2017	Reached out to the 58 schools that have not reported implementation of BMPs. A total of 26 were verified.

<b>Outreach Planned</b>	
2018	Contact remaining Milwaukee area universities, colleges, and schools regarding whether best management practices have been implemented and aim for total compliance.
If effluent concentrations do not decrease	Commence sampling if schools remain unresponsive regarding implementation of best management practices
As grant funding is available	Collect mercury, and items containing mercury

Outreach may include newspaper articles or advertisements, mailings, workshops, speaking engagements, etc. Identify type and date.

## FORM 7C: Industry Compliance and Outreach Summary

### General Outreach to All Industrial Facilities

<b>Outreach Accomplished</b>	
1992	Adoption of local limit, implementation in permits
2000 - 2001	Collection programs open to industrial equipment
2010	327 sample results, including 276 (84%) no-detects and one violation
2011	280 sample results, including 219 (78%) no-detects and one violation
2012	320 sample results, including 246 (77%) no-detects and eight violations (including industrial parks)
2013	438 sample results, including 325 (74%) no-detects and eight violations (including industrial parks)
2014	325 sample results, including 262 (81%) no-detects and five violations (including industrial parks)
2015	427 sample results, including 351 (82%) no-detects and six violations (including industrial parks)
2016	413 sample results, including 351 (85%) no-detects and three violations (including industrial parks)
2017	296 sample results, including 279 (94%) no-detects and three violations (including industrial parks)

<b>Outreach Planned</b>	
Continuing	At individual significant industrial users, sampling and, as necessary, enforcement.
Continuing	Sampling at industrial parks, once per year, for three consecutive days. If sampling identifies high mercury concentrations, then tracking to the source will occur

Outreach may include newspaper articles or advertisements, mailings, workshops, speaking engagements, etc. Identify type and date.

## Form 8A: General Public Mercury Checklist and Outreach Summary

Best Management Practices for mercury are defined as reducing household use of new mercury-containing products and recycling (rather than discarding) old mercury-containing products.

List participation by households in reducing their use of new mercury containing products (i.e.: retail stores that no longer sell mercury fever thermometers) and participation by households in recycling their old mercury-containing products (i.e.: “CleanSweep” events for mercury thermometers). Include adoption of local ordinances that affect mercury product sale or recycling. *Note: Common household mercury products include fever and other thermometers, thermostats, “silent” light switches, and containers of liquid mercury.* Attach additional sheets as necessary.

Household Mercury Product	Discontinued Sale (Describe)	Recycled Products (Quantity)
Mercury waste collected by the Household Hazardous Waste Collection Program (excluding fluorescent lamps)		364 Pounds

Outreach activities to households (and retail stores). List date accomplished. Attach additional sheets as necessary.

*Sector Evaluation*

The score for the General Public Sector is calculated based on a formula that uses POTW size and the number of outreach events. The maximum value for the general public sector score is 100.

$$\frac{100}{\text{\# of outreach events}} \times \frac{1}{\text{facility factor}} = \frac{100}{\text{General Public Mercury PMP Score}}$$

## Form 8D: Fluorescent Bulb Mercury Checklist and Outreach Summary

Best Management Practices for mercury are defined as increasing business and household use of energy-efficient low-mercury fluorescent bulbs and recycling (rather than discarding) burned out fluorescent bulbs.

List participation by businesses and households in recycling their burned out fluorescent bulbs, including both continuous and one-time “CleanSweep” events. Include adoption of local ordinances that affect fluorescent bulb recycling. Attach additional pages as necessary.

### Sector Evaluation

The score for the Fluorescent Bulb Sector is calculated based on a formula that uses POTW size and the number of outreach events. *The maximum value for the fluorescent bulb sector score is 100.*

$$\frac{100}{\text{\# of outreach events}} \times \frac{1}{\text{facility factor}} = \frac{100}{\text{Fluorescent Bulb Mercury PMP Score}}$$

*Enter on Form 10 under IID: Fluorescent Bulb Sector Score*

1-----4.9 .....	10
5----49.9 .....	5
50----250 .....	1

### FORM 9A: Historical Mercury PMP Score

This form gives credit to your POTW for mercury reduction projects completed before implementing a Mercury PMP. The information on the form will not change from year to year. The form is divided into outreach aimed at wastewater sectors and outreach aimed at optional sectors (dairy manometer outreach refers to farms that have participated in replacing and recycling their milk house mercury manometers). For each outreach activity that your POTW has done in the past, put a check in the corresponding box. To calculate your Historical Mercury Score, count the total number of boxes checked and enter that number in the box on the bottom of the page and also on Form 10.

### FORM 9B: Extra-jurisdictional Mercury PMP Score

This form gives credit for mercury projects your POTW has completed outside the treatment plant service area. For the initial plan, include all activities you have implemented. For the annual report, include all activities that have occurred only in the past 12 months. The form is divided into outreach aimed at wastewater sectors and outreach aimed at optional sectors. For each outreach activity or sector accomplishment, put a check in the corresponding box. To calculate your Extra-jurisdictional Mercury Score, count the total number of boxes checked and enter that number in the box on the bottom of the page and also on Form 10.
