

Chapter 7: Goal and Objectives

7.1 Overview

The publicly-inspired goals and objectives were identified as part of the integrated watershed planning efforts of the Southeastern Wisconsin Regional Planning Commission and Milwaukee Metropolitan Sewerage District, jointly referred to as the Water Quality Initiative. The outcome of this collective process identified the goals and objectives for the facilities plan, which are presented in the Chapter 7 of the *Facilities Plan Report*.

The goals and objectives for the *Treatment Report* are the same as the goals and objectives for the facilities plan. Therefore, refer to Chapter 7 of the *Facilities Plan Report* for a complete discussion of the goals and objectives development process.
