

Reforestation & Wetland Restoration Program

Project Information

The Reforestation & Wetland Restoration Program is looking to plant 6 million trees and restore/enhance 4,000 acres of wetlands in the Greater Milwaukee Watersheds. Projects can be on public and private property within the project area. **Enter your address into the map on the program home page to see if your property address is within the program area. If your address IS within the program area, the map will look green.**

This program offers:

- + Support developing tree planting & wetland plans
- + Access to trees
- + Project implementation (tree planting & wetland restoration)

This submission is **NOT** a funding request. This submission adds your project to a list of potential projects the program may choose to provide with technical assistance, supplies, construction assistance, etc. The information in your submission will help the team assess the level that your project helps achieve programmatic goals and will be used to align projects with potential future funding opportunities.

The project team is looking for larger-scale projects on public and private property that are at least an acre in size. **The person submitting this application must be the landowner.**

Preferred qualifications:

- + High number of trees to be planted
- + One or more acres of wetlands to be enhanced/restored
- + Connecting/enhancing ecological corridors
- + Located in a socially vulnerable area (urban areas only)
- + Shovel ready & low level of land preparation
- + Ability to maintain
