**Chapter 12, Connections To Sanitary Sewers From
Private Sewage Disposal Systems**

Adopted August 18, 1982

12.01

At such times as a sanitary or combined public sewer becomes available to a property served by a sewage disposal system or treatment facility, a direct connection shall be made to the public sanitary or combined sewer in compliance with the terms of these rules. Any septic tank, cesspool, or other private sewage disposal or treatment facilities shall be abandoned and filled with suitable material.

12.02

No connection shall be made to any sanitary sewer if said connection is carrying septic tank effluent.
