

Table of Contents

Chapter 1: Introduction	1-1
1.1 Purpose.....	1-1
1.2 Description and Responsibilities of the Milwaukee Metropolitan Sewerage District.....	1-1
1.3 History of Facilities Planning	1-1
1.4 Purpose and Need – 2020 Facilities Plan.....	1-1
1.5 Watershed Approach to Facilities Planning.....	1-2
1.6 Planning Objective.....	1-2
1.7 Relationship to the Regional Water Quality Management Plan Update.....	1-3
1.8 Public Involvement	1-3
1.9 Planning Principles	1-3
1.10 Description of Planning Process	1-3
1.11 Treatment Report Organization	1-3
Chapter 2: Description of Treatment Facilities	2-1
2.1 Introduction.....	2-1
2.2 Milwaukee Metropolitan Sewerage District Service Area	2-1
2.3 Private Systems	2-1
2.4 The Milwaukee Metropolitan Sewerage District System	2-3
2.4.1 Inline Storage System Pump Station.....	2-3
2.4.2 Jones Island Wastewater Treatment Plant	2-3
2.4.3 South Shore Wastewater Treatment Plant	2-8
2.4.4 Biosolids Facilities.....	2-8
2.4.5 Recycling Biosolids (Milorganite® and Agri-Life®)	2-14
2.4.6 Energy Facilities	2-14

Chapter 2*Figures*

2-1	Treatment Plant Service Areas for Potential Operations	2-2
2-2	JIWWTP Site Plan	2-5
2-3	JIWWTP	2-7
2-4	SSWWTP Site Plan.....	2-9
2-5	SSWWTP.....	2-11
2-6	JIWWTP Biosolids Facility	2-12
2-7	SSWWTP Biosolids Facility.....	2-13

Chapter 3: Analytical Methods/Data Sources..... 3-1

3.1	Introduction.....	3-1
3.2	Information Compilation	3-1
3.3	Flow and Wasteload Development	3-6
3.3.1	Flow Development.....	3-6
3.3.2	Wasteload Development	3-6

Chapter 3*Tables*

Table 3-1	Information Compilation	3-2
-----------	-------------------------------	-----

Chapter 4: Treatment Assessment – Existing Condition..... 4-1

4.1	Introduction – Flows and Wasteload Development.....	4-1
4.1.1	Design Capacity	4-2
4.1.2	Existing System Flows.....	4-3
4.1.3	Existing Wasteloads.....	4-10
4.2	Treatment Process Evaluation.....	4-16

4.2.1	Treatment Plants Overview.....	4-16
4.2.2	Utility, Electric, and Instrumentation & Control Processes.....	4-18
4.2.3	Treatment Plant Unit Process Evaluation	4-24
4.2.4	Biosolids Evaluation	4-49
4.2.5	Air Emissions Evaluation	4-61
4.3	Treatment Systems Operations Documentation.....	4-62
4.3.1	Operator – United Water Services	4-62
4.3.2	Inline Storage System Pump Station Operation.....	4-63
4.3.3	In-Plant Diversion Structure Operation	4-63
4.3.4	Biosolids Operation	4-65
4.3.5	Energy Operation	4-66
4.4	Treatment Systems Policies/Programs Documentation.....	4-68
4.4.1	Industrial Pretreatment.....	4-68
4.4.2	Household Hazardous Waste	4-68
4.5	Treatment System Performance Review and Analysis.....	4-69
4.5.1	Review of Wet Weather Events.....	4-69
4.5.2	Blending	4-75
4.5.3	Biosolids Production.....	4-83
4.5.4	Wisconsin Department of Natural Resources Compliance Review	4-84
4.5.5	United Water Services Review	4-86
4.5.6	Other Milwaukee Metropolitan Sewerage District System Evaluations	4-88

Chapter 4

Tables

4-1	Design Flow Capacity.....	4-2
4-2	Design Wasteload Capacity	4-3
4-3	MMSD System Flow Breakdown of Billable Flow by User Category	4-4
4-4	Wastewater Treatment Plant Existing Flows Comparison: Design Average Daily Flow to Actual Average Daily Flow	4-6
4-5	Potential Peak Deliverable Collection System Flows to Treatment Plants	4-7

4-6	Comparison of Potential Conveyance System Deliverable Flow to Treatment Plant Design Capacity	4-8
4-7	Jones Island Wastewater Treatment Plant Recorded Peak Hourly Flows in Excess of Design Peak Hourly Flow	4-9
4-8	South Shore Wastewater Treatment Plant Peak Hourly Flows in Excess of Design Peak Hourly Flow	4-10
4-9	Milwaukee Metropolitan Sewerage District Breakdown of Billable System Wasteload by User Class	4-11
4-10	Wastewater Treatment Plant Existing Wasteloads Comparison: Design Average Day Wasteloads to Actual Average Daily Wasteloads	4-14
4-11	Wastewater Treatment Plant Existing Condition Comparison: Design Maximum Wasteloads to Actual Influent Maximum Wasteloads, 1999-2003 .	4-15
4-12	JIWWTP Unit Process Analysis	4-27
4-13	JIWWTP Comparison of Processes to Current Design Regulations	4-29
4-14	SSWWTP Unit Process Evaluation	4-43
4-15	SSWWTP Comparison of Processes to Current Design Regulations.....	4-45
4-16	Milorganite® Processes	4-51
4-17	Agri-Life® Processes.....	4-56
4-18	Interplant Solids Pumping.....	4-61
4-19	United Water Services Contract Effluent Limits Compared to Wisconsin Department of Natural Resources Permit Effluent Limits	4-63
4-20	Jones Island Wastewater Treatment Plant Diversion Points.....	4-65
4-21	South Shore Wastewater Treatment Plant Diversion Points.....	4-65
4-22	Summary of <u>Estimated</u> Blending 1997-2004.....	4-75
4-23	Milorganite® Production 1998-2003	4-83
4-24	Agri-Life® and Filter Cake Production 1998-2003	4-84
4-25	1999-2003 Treatment Plant Compliance Maintenance Annual Report Point Values ...	4-86
4-26	Yearly Average Effluent Water Quality 1999-2003	4-86

Chapter 4*Figures*

4-1	Flow Trends	4-5
4-2	BOD Trends	4-12
4-3	TSS Trends.....	4-13
4-4	JIWWTP Energy Schematic	4-20
4-5	SSWWTP Energy Schematic.....	4-23
4-6	Instrumentation and Control System Schematic.....	4-25
4-7	Primary Clarifier Influent Channel Discharge.....	4-34
4-8	Primary Clarifier #1 and #2 during a Wet Weather Event.....	4-35
4-9	Primary Clarifier #2 and #3 during a Wet Weather Event.....	4-36
4-10	Primary Clarifier #3 and #4 during a Wet Weather Event.....	4-37
4-11	Primary Clarifier #4 and #6 during a Wet Weather Event.....	4-38
4-12	Milorganite® Production	4-55
4-13	In-Depth Analysis: Event B, August 1998	4-71
4-14	In-Depth Analysis: Event H, May 2000	4-72
4-15	In-Depth Analysis: Event I, Sept. 2000	4-73
4-16	Effluent Quality Analysis: Event B – JIWWTP	4-77
4-17	Effluent Quality Analysis: Event B – SSWWTP.....	4-78
4-18	Effluent Quality Analysis: Event H – JIWWTP	4-79
4-19	Effluent Quality Analysis: Event H – SSWWTP	4-80
4-20	Effluent Quality Analysis: Event I – JIWWTP.....	4-81
4-21	Effluent Quality Analysis: Event I – SSWWTP	4-82

Chapter 4*Appendices*

4A	MMSD Annual Average Flow and Wasteload Review	4A-1
4B	Storm Event Summary Data	4B-1
4C	ISS Pumpout Analysis	4C-1
4D	MMSD/UWS In-Plant Diversion Records.....	4D-1

4E	JWWTP and SSWWTP Wet Weather Peak Hourly Flow Analysis	4E-1
4F	MMSD WWTP Unit Process Analysis and Regulation Review	4F-1
4G	SSWWTP Volatile Solids Reduction Analysis.....	4G-1
4H	UWS Storage Digester Inventory Review	4H-1
4I	Rain Event Summary Master Spreadsheet Information.....	4I-1
4J	Wet Weather Events Analysis	4J-1

Chapter 5: Treatment Assessment — Future Condition 5-1

5.1	Introduction.....	5-1
5.2	Flows and Wasteload Development.....	5-1
5.1.1	Future Design Capacity.....	5-2
5.1.2	Future System Flows	5-2
5.1.3	Future Wasteloads.....	5-8
5.2	Treatment Process Evaluation.....	5-15
5.2.1	Utility, Electric, and Instrumentation & Control Processes.....	5-17
5.2.2	Treatment Plant Unit Process Evaluation	5-18
5.2.3	Biosolids Evaluation	5-30
5.2.4	Air Emissions Evaluation	5-38
5.3	Future Condition Operations.....	5-58
5.3.1	Operation and Maintenance Contracts.....	5-58
5.3.2	Inline Storage System Pump Station Operations	5-58
5.3.3	In-plant Diversion Structure Operation	5-58
5.3.4	Biosolids and Energy Operations.....	5-59
5.4	Policies/Programs Documentation.....	5-59
5.5	Treatment System Performance Review and Analysis.....	5-59
5.5.1	Revised 2020 Baseline Simulated Wet Weather Events.....	5-59
5.5.2	Future Blending and Effluent Quality.....	5-59
5.5.3	Future Biosolids Production	5-60
5.5.4	Future Wisconsin Department of Natural Resources Compliance Review	5-61

Chapter 5*Tables*

5-1	MMSD System Billable Flow by User Category: Actual Average Flow to Projected Future Flows.....	5-3
5-2	Wastewater Treatment Plant Average Daily Flows Comparison: Design Average Daily Flow to Actual Average Flow and Projected Future Flows.....	5-3
5-3	Potential Peak Future (Revised 2020 Baseline) Collection System Flows to Treatment Plants	5-7
5-4	Comparison of Potential Future (Revised 2020 Baseline) Conveyance System Deliverable Flow to Treatment Plant Design Capacity	5-8
5-5	MMSD System Billable Wasteloads by User Class: Average Daily Existing Wasteloads to Projected Future Wasteloads.....	5-9
5-6	Wastewater Treatment Plant Wasteloads Comparison: Design Average Day Wasteloads to Actual Average and Projected Future Average Day Wasteloads.....	5-12
5-7	Wastewater Treatment Plant Wasteloads Comparison: Design Maximum Wasteloads to Actual Maximum and Project Future Maximum Wasteloads	5-16
5-8	JIWWTP Unit Process Evaluation – Revised 2020 Baseline Condition	5-19
5-9	JIWWTP Comparison of Revised 2020 Baseline Operations of Processes to Current Design Regulations.....	5-21
5-10	SSWWTP Unit Process Evaluation – Revised 2020 Baseline Condition.....	5-26
5-11	SSWWTP Comparison of Revised 2020 Baseline Operations of Processes to Current Design Regulations.....	5-28
5-12	Milorganite® Processes – Revised 2020 Baseline Condition	5-32
5-13	Agri-Life® Processes – Revised 2020 Baseline Condition.....	5-35
5-14	Interplant Solids Pumping – Revised 2020 Baseline Condition.....	5-38
5-15	JIWWTP Air Emission Evaluation.....	5-40
5-16	SSWWTP Air Emission Evaluation	5-51
5-17	Projected Revised 2020 Baseline Peak Flow Effluent Quality Compared to UWS Contract Effluent Limits and WDNR Permit Effluent Limits.....	5-60
5-18	Actual and Projected Milorganite®, Agri-Life®, and Filter Cake Production	5-60
5-19	2004 Compliance Maintenance Annual Report Review.....	5-62

Chapter 5*Figures*

5-1	Projected Future Billable Flow Trends	5-4
5-2	Projected Future WWTP Influent Flow Trends	5-5
5-3	Projected Future Billable BOD Trends	5-10
5-4	Projected Future Billable TSS Trends	5-11
5-5	Projected Future WWTP Influent BOD Trends.....	5-13
5-6	Projected Future WWTP Influent TSS Trends	5-14

Chapter 5*Appendices*

5A	Future Condition Flow and Wasteload Analysis	5A-1
5B	Harbor Siphon Capacity Memorandum	5B-1
5C	MMSD System Revised 2020 Baseline Condition Mass Balance Analysis	5C-1
5D	Revised 2020 Baseline Condition Unit Process Calculations.....	5D-1
5E	Projected CMAR Results Analysis.....	5E-1

Chapter 6: Wastewater Treatment Plant Permits..... 6-1

6.1	Introduction.....	6-1
6.2	Current Milwaukee Metropolitan Sewerage District Wisconsin Pollutant Discharge Elimination System Permit Requirements	6-1
6.2.1	Influent Requirements.....	6-1
6.2.2	Surface Water Requirements	6-2
6.2.3	Land Application Requirements	6-9
6.2.4	Standard Requirements	6-13
6.3	Current Milwaukee Metropolitan Sewerage District Air Pollution Control Operation Permits	6-13

Chapter 6*Tables*

6-1	JWWTP and SSWWTP Influent Monitoring Requirements	6-2
6-2	SSWWTP Sampling Point No. 001: Effluent Monitoring Requirements and Effluent Limitations	6-4
6-3	SSWWTP Sampling Point No. 001: Total Ammonia Nitrogen (NH ₃ -N) Weekly Limitations, mg/L	6-5
6-4	JWWTP Sampling Point No. 002: Effluent Monitoring Requirements and Effluent Limitations	6-6
6-5	JWWTP Sampling Point No. 003: Non-Contact Cooling Water Monitoring Requirements and Effluent Limitations	6-7
6-6	JWWTP Sampling Point No. 040: In-Plant Diversion Monitoring Requirements	6-8
6-7	Sampling Points No. 004 and 005: Agri-Life® and Anaerobically Digested Cake Sludge Monitoring Requirements and Effluent Limitations.....	6-11
6-8	Sampling Point No. 006: Milorganite® Monitoring Requirements and Limitations	6-12

Chapter 6*Appendices*

6A	MMSD WPDES Permit	6A-1
6B	Jones Island Wastewater Treatment Plant Air Pollution Control Operating Permit	6B-1
6C	South Shore Wastewater Treatment Plant Air Pollution Control Operating Permit	6C-1

Chapter 7: Goals and Objectives..... 7-1

7.1	Overview.....	7-1
-----	---------------	-----

Chapter 8: Common Treatment Facilities, Programs, Operational Improvements and Policies for the Recommended Plan..... 8-1

8.1	Introduction.....	8-1
-----	-------------------	-----

8.2	Committed Milwaukee Metropolitan Sewerage District Treatment Projects.....	8-1
8.3	Recommended Milwaukee Metropolitan Sewerage District Treatment Projects.....	8-2
8.4	Other Recommended Milwaukee Metropolitan Sewerage District Treatment Projects..	8-5
8.4.1	Unit Process/Regulation Review	8-5
8.4.2	Hydraulic Analysis of Jones Island Wastewater Treatment Plant.....	8-7
8.4.3	Capacity Analysis of South Shore Wastewater Treatment Plant.....	8-7
8.4.4	Rehabilitate ISS Pump Station.....	8-8
8.4.5	Jones Island Wastewater Treatment Plant Aeration and Blower Systems Evaluation	8-8
8.4.6	Geotechnical/Structural Analysis of Both Wastewater Treatment Plants	8-9
8.5	Additional Treatment Recommendations	8-10

Chapter 8

Tables

8-1	Committed Treatment Projects for the Recommended Plan.....	8-3
8-2	Recommended Milwaukee Metropolitan Sewerage District Projects – Included in 2007 Annual Budget	8-4
8-3	Milwaukee Metropolitan Sewerage District Comparison of Revised 2020 Baseline Operation of Processes to Current Design Regulations and Advisory Standards	8-6

Chapter 9: Alternative Analysis 9-1

9.1	Introduction.....	9-1
9.2	State of the Art Report – Individual Treatment Technologies.....	9-2
9.2.1	Point Source Indicators used in Analysis.....	9-2
9.2.2	South Shore Wastewater Treatment Plant Treatment Options	9-3
9.2.3	Jones Island Wastewater Treatment Plant Treatment Options	9-6
9.2.4	Inline Storage System Pumping Options	9-7
9.3	Preliminary Treatment Alternatives.....	9-8
9.3.1	State of the Art Report Findings	9-8
9.3.2	Treatment Technologies Identified for Future Analysis.....	9-8

9.4	Alternatives Analysis	9-13
9.4.1	Screening and Preliminary Alternatives	9-13
9.4.2	Treatment Technology Combination for 5-Year Level of Protection	9-15
9.4.3	Treatment Technology Combination for 10-Year Level of Protection	9-17
9.5	Recommended Treatment Alternatives.....	9-17
9.5.1	Additional Inline Storage System Pumping to Jones Island Wastewater Treatment Plant	9-17
9.5.2	South Shore Wastewater Treatment Plant Additional Treatment Capacity.....	9-17
9.5.3	Considerations in Implementation	9-22
9.6	Biosolids Analysis Introduction.....	9-22
9.6.1	2020 Baseline Influent Wasteloads and Biosolids Production	9-23
9.6.2	Cost Development.....	9-25
9.7	Biosolids Screening Alternatives Evaluation.....	9-26
9.7.1	Selection of Screening Alternatives and Evaluation Parameters.....	9-26
9.7.2	Projected Future Influent Wasteload	9-27
9.7.3	Future Sludge Production	9-28
9.7.4	Screening Alternatives Summaries.....	9-29
9.8	Milorganite® and Glass Furnace Technology Sensitivity Analysis.....	9-60
9.8.1	Introduction.....	9-60
9.8.2	Base Case Assumptions	9-60
9.8.3	Sensitivity Analysis	9-61
9.8.4	Results.....	9-61
9.8.5	Conclusions of the Sensitivity Analysis	9-63
9.9	Recommended Plan Alternatives.....	9-67
9.9.1	Selection of Recommended Plan Alternatives and Evaluation Parameters.....	9-67
9.9.2	Projected Future Influent Wasteloads.....	9-68
9.9.3	Future Sludge Production	9-69
9.9.4	Recommended Plan Alternative Summaries	9-69
9.10	Interim Recommended Biosolids Plan	9-107
9.10.1	Recommended Plan Alternatives Cost Summary and Interim Recommended Plan ...	9-107

9.10.2	Interim Recommendations	9-109
9.10.3	Biosolids Interim Recommendations Summary	9-114

Chapter 9

Tables

9-1	Outer Harbor Assessment Point OH-11 Days per Year Meeting Water Quality Measures	9-1
9-2	Alternative B Variation Descriptions.....	9-14
9-3	Cost For Additional Inline Storage System Pumping to Jones Island Wastewater Treatment Plant for 5-Year Level of Protection	9-15
9-4	Cost for Additional Treatment Capacity to South Shore Wastewater Treatment Plant for 5-Year Level of Protection.....	9-16
9-5	Cost for Additional Treatment Capacity to Jones Island Wastewater Treatment Plant for 10-Year Level of Protection.....	9-18
9-6	Year 2004 Milorganite® and Agri-Life® Production Costs	9-26

Chapter 10: Treatment Recommended Plan.....	10-1
10.1 Introduction.....	10-1
10.1.1 Background.....	10-1
10.1.2 Plan Summary.....	10-2
10.2 Wet Weather Control Plan – Milwaukee Metropolitan Sewerage District Treatment Facilities.....	10-7
10.3 Plan for Existing Treatment Facilities	10-10
10.4 Biosolids Plan	10-12
10.5 Committed and Common Treatment Facilities.....	10-15
10.5.1 Milwaukee Metropolitan Sewerage District Committed Treatment Facilities	10-15
10.5.2 Recommended Milwaukee Metropolitan Sewerage District Projects	10-16
10.6 Other Recommended Milwaukee Metropolitan Sewerage District Projects	10-18
10.6.1 Treatment Issues Identified under Regulation Review.....	10-18
10.6.2 Additional Recommendations for Milwaukee Metropolitan Sewerage District to Consider.....	10-18

Chapter 10

Tables

10-1 Summary of 2020 FP Treatment Recommendations – New FPOPs Identified by 2020.....	10-4
10-2 Summary of Existing Treatment FPOPs Recommended by 2020 FP to be Continued.	10-5
10-3 Wet Weather Control Plan – Treatment Facilities.....	10-9
10-4 Plan for Existing Milwaukee Metropolitan Sewerage District Facilities	10-11
10-5 Project Elements for Interim Biosolids Management Plan.....	10-14
10-6 Committed Treatment Facilities Projects.....	10-15
10-7 Recommended Projects by Milwaukee Metropolitan Sewerage District – Treatment Facilities.....	10-17
